Stryker BACnet® VAV Controller

Accelerated Installation

Off-the-shelf configurability

Stryker BACnet® VAV Controller

Honeywell welcomes the introduction of the Stryker BACnet VAV Controller to the Stryker family. Fully compatible with WEBs-AX and WEBs-N4, the Stryker BACnet VAV Controller uses the same tools as our existing Lon Stryker VAV and comes pre-loaded to fit most variable air volume (VAV) applications.

Honeywell's Stryker BACnet VAV Controller is perfect for quick installations and jobs with a large number of VAV boxes where programming time can be significant. With Stryker BACnet VAV Controller you'll have a robust configurable controller that can be easily installed.

With off-the-shelf configurability the Stryker BACnet VAV Controller is ready to go, letting you get more done, in less time.

Features and Highlights

- **Easy Installation.** Built-in configurations means the controller can be up and running quickly so you can move on to the next job.

- **LonWorks and BACnet Compatible.** Stryker VAV controllers support both LonWorks and BACnet protocols. Stryker CVAHU controllers support only LonWorks protocol.

- **Flexibility.** Configurable for stand-alone, WEBs-AX or WEBs-N4 system applications. Can also be configured for Zio® and Zio Plus wall modules.

- **Built on Trusted Hardware.** The Stryker BACnet VAV Controller uses Spyder hardware.

- **Accessory Loops.** Adapt unused input and outputs to run customized control logics. Doing this can often eliminate the need for an additional controller or thermostat.

Ordering Information

| ITEM NUMBER	PROTOCOL	DESCRIPTION
CVL4022AS-VAV1	LonWorks	Configurable VAV Controller with Actuator
CVB4022AS-VAV1	BACnet	NEW! Configurable VAV Controller with Actuator
CVL4024NS-VAV1	LonWorks	Configurable VAV Controller without Actuator
CVB4024NS-VAV1	BACnet	NEW! Configurable VAV Controller without Actuator
CUL6438SR-CV1	LonWorks	Configurable CVAHU Controller
